

Pipe Assembly Lubricant Paste

Edition: 14 October 2026 | Version 1.1

Product and applications

Lubricant paste for assembling plastic pipes and fittings with rubber seals, including PVC systems. Provides lubrication during assembly, helps maintain the seals and makes later disassembly easier. Designed for indoor and outdoor sanitary installations.

Technical data

Property	Manufacturer's specification
Type of product	Assembly lubricant paste
Type of joint	Pipe joints with rubber seals
Recommended temperature range	-20°C to +60°C

Operating parameters are manufacturer specifications.

Application

Lubricate the rubber-sealed joint during assembly. Follow the instructions for the pipes, fittings and seals. Flush drinking-water installations with water before putting them into service.

Storage and shelf life

Store in tightly closed containers in a dry, well-ventilated area, away from food, drinks and incompatible materials. The manufacturer declares an indefinite shelf life when stored correctly.

Product documentation and precautions

Hygienic certificate B.BK.60110.1285.2026 covers drinking-water use subject to its stated conditions. It ceases to be valid after 29 July 2029 or if the formulation or manufacturing technology changes. Keep out of reach of children and avoid contact with eyes. Follow the product Safety Data Sheet.

Packaging

Net contents	Packaging	Product code	EAN
125 ml	Tube	NAZ-P-125	5907678808127
300 ml	Oval tube	NAZ-P-300	5907678808028
500 ml	Bottle	NAZ-P-500	5907678808202
1000 ml	Pail	NAZ-P-1000	5907678808196
